

EDUCATION

- **Rheinland-Pfälzische Technische Universität Kaiserslautern-Landau - RPTU** Kaiserslautern, DE
MSc in Computer Science; 2026 – present
- **PES University** Bengaluru, IN
B.Tech in Computer Science; GPA: 7.78 / 10 2018 – 2022

EXPERIENCE

- **Akamai Technologies** Bengaluru
Software Engineer II Mar 2025 – April 2026
 - Delivered and designed a full-stack application Calligo, using React, FastAPI and PostgreSQL. It is a comprehensive Internal DID (Extension) (Direct Inward Dialing) number management system designed for efficient allocation and management of phone numbers across different countries. This web-based application provides an intuitive interface for requesting, assigning, and managing phone numbers, with features for both standard users and administrators.
 - Improved NADU config platform with enhanced validation, global variables, template editing, and optimized search/filter UI.
 - Developed and designed WXSwitch, a lightweight self-service tool that lets employees temporarily assume an elevated role (Agent or Supervisor) for testing and support. The app assigns a temporary calling extension (when needed), updates Webex licenses, and reverts changes when done. This was built on React, FASTAPI and POSTGRESQL.
 - Designed and built automation for password rotation using Ansible improving system security and reliability.
- **Akamai Technologies** Bengaluru
Software Engineer Jan 2022 – Mar 2025
 - Developed full-stack engineering tools using React, Node, and Express for internal release workflows.
 - Created network automation platform with React, Flask, and NetMRI for datacenter device upgrades.
 - Automated CI/CD workflows for engineering teams improving deployment consistency.
 - Contributed to EAA security automation and access provisioning workflows.
- **Kickhead Softwares** Bengaluru
Software Engineering Intern Jul 2020 – Sep 2020
 - Worked on Django backend development and integrated Stripe for international payments.

PROJECTS

- **Twitter Clone** Django, React
 - Complete Twitter-style app with login, posts, likes, retweets, and a follow system. GitHub
- **Image Classification App** Django, React, TensorFlow
 - Web application integrated with a trained image classification CNN model for multi-category classification. GitHub
- **Image Compressor** React
 - Browser-based image compression tool to reduce file size. Website
- **Streamer** React, RTMP
 - Twitch-style live streaming platform utilizing RTMP ingestion and Google Authentication. GitHub

ACHIEVEMENTS

- Solved 700+ Leetcode problems (Global Rank 20k).
- Technical Lead – Ingenius Hackathon.

SKILLS

- **Languages:** C++, Python, JavaScript
- **Frameworks:** React, Django, Flask, Node.js, FASTAPI, ExpressJS
- **Tools:** REST APIs, MySQL, OpenAPIs, Cloudbees, Jenkins, Git
- **Core:** Data Structures & Algorithms, SDLC, AGILE
